expressed confidence that they would be able to check the spread of the disease. The death of young delpi naturally caused no little excitement in the city among the key public. Physicians, low-ever, expressed no apprehension and catot their bolief that it was quite possible to arrest a spread of the favor. The board during the day had ordered a significant particular states of the favor of t rigid quarantine against all points on the gulf coast, and had taken every precaution to guard against the entry into the city of any person from Ocean

We have no fear," said Dr. Winsley, noting president of the board of health, "that the fever will spread in New Orloans. The board of health is pre-Orleans. The board of health is pre-pared to spend a million to stamp it out, and we see no reason to feel alarmed. Paople ought not to get frightened. This one case was taker charge of in time, and such scientific futhe hope that we shall promptly and effectively stamp out the disease.

(The lack that a daily train for San Francisco passes through this city from Now Orleans and Gaivestan by way of Ri Paso makes the dispatch of great interest to Freeno county. Physicians have expressed the opinion that if once "yellow jack" enlered this valley it could move the stamped out. The necestry for the precentions is obvious, Colder weather is at hand, a circumstance very lavorable to arresting the disease.)

finally moved, and she took the girkneme.

But Ayer did not fare so well. Officer George took him to jail and placed a charge of drunkenness against him. Yesterday morning friends interceded in his behalf and Recorder Clark ordered him released from jail.

In recurding his arrost Policeman Goorge cimply stated that the charge was "frank" and the recorder thought it was no ordinary case of that common complaint. Later in the day he learned the facts of Ayer's arrest and tried to Ind him, but without success. The parents did not appear during the day to lile any complaint against Ayer.

Ayer is a young man who lives in the country. Ho drank too much Sunday night and this was the cause of bis hing led into the unpleasant eccapade.

The girl has been running ground on the streets very nuce, and though of lander years she already has a repotation. How the motion learned that the pair were in the saloon is not known.

OPPOSITION OF BUNCOMBE. The Expositer is opposed to building a bridge over the tracks of the Southern Pacific railroad. The reason for this opposition is one of the inscrutable things that lies securely within the inthings that lies securely within the in-ner recesses of that mysterious paper. But at any rate it is so much opposed to a bridge that it undertakes to offset that proposition with the domand that Maristreet be opened across the railroad poss street of data the public to record its preference between a bridge and the opening of that street by filling

The that are required for public use. The farmers' Club have unanimously indorsed the proposition to build a bridge, and evidently not a voice would be raised in that body in opposition to the opening up of closed streets. The latter question is also one which desmand. The vight of the city to the attention. The right of the city to the attention. The right of the city to the use of its streets should be legally established, but this is no reason why that contention should serve to defeat the demand for a bridge.

Tue free trade paper says there is t ches relation between the tariff and freight charges. There may be, but it is a fact that there has been no advance in freight charges on California products that received the most liberal consider ation from the framers of the new tariff law. There has been no raise in freight charges on our raisins and dried fruits. The charges are the same as they were Wilson tariff, but that does under the wisson tarin, and that does not change the fact that they are too high and should be raduced. The pro-ducers of California are justly entitled to lower rates on their dried fruits and raising as well as the protection they receive from the tariff. And the time

BETTER TIMES.

In a recent brief visit to San Fran cisco the writer met and conversed with men from a dozen or a score of Cali-fornish cities and towns. Naturally the fornian cities and towns. Naturally the conversation in every instance turned to the present condition of the times. In every case, too, the report from the town represented was of the same gen-eral character: Times are better; ousness is picking up; farmers and morchants alike were feeling more hopeful than they had felt in years, and the out-

look was cheering.

bad grain and fruit in plenty in the past, but, between a railroad monopoly and a demoralized market, we have very largely raised them in vain. The farmer has had what the railroad and the com mission man left, and too frequently they left little or nothing except a bal-ance on the wrong side of the ledger. Now the condition is changed, the rai road is not without competition and it commission dealer has lost his first

And if prices are chilting things, if And it prices are entiting manage, they are up one day and down another, a competing relirond is a permanent thing and the middleman's grip, once lost, is not easily regained. If the peo-ple of the United States have cause to congratulate themselves on the return of prosperity, and they have, the people of California in particular, and of the San Josquin valley even more particu-larly, have occasion to doubly rejoice. The Cleveland administration is but six months dead, but already better times than the country has known in year ore with it.

Now the dispotches seemt that a West Virginia clergyman has been onjoined from preaching termons expressive of sympathy with the strikers. The courts are getting it down fine. The Master of this shopherd was accustomed to go about expressing sympathy for the poor and oppressed. Would he be enjoined from doing his life work were he now in West Virginia? Presumably he would, for his offense would be precisely that of the one of his disciples who has been enjoined. It is a little hard if one can-

a solemn warning to all wealthy tramps.

Phil Francis, in the Stockton Mail, referr to Rav. Hudelson, the fellow who reemtly testified that he always considered himself better than the fallen woman on whose earnings he at one time lived, as a "mean skunk." This leaves comething to be ead in behalf of the akunk: It was created a skunk, and could not help it. Hudelson was created in the form of a man, and might, at least, have made a pretence of being one. There are times when we do not appear to display enough charity for skunks.

Is not far distant when shey will get it.

Amenous Birrac's desilte of dialect in literature may be geouine, but his objection to it certainly has a peculiar sound from the author of the "Little Johnny" letters.

This hen whose lay now is running through the columns of the pross, what state is she really from? One paper rouse the jingle and entitlest, "The Lay rouse the breach Hen;" the next paper locates the hen and her lay in Kansas, the next in Texas, another in Wisconsin,

still another in California. And so is goes; never was a lowly hen distributed goes; never was a lowly hen distributed more generally and impartially over a great republic. And, in this meantime, some newspaper worker whose mind svoived the bright jingle has been practically defrauded of the child of his brain. I would like to know where the hen belongs, and I wigh that I might see her given back to her owner. In brief:

You may sing, if you please, of the humble hen,

And I'll old the cookle and say, "Amen I" you may chart her perios load and clear And I'll oyou not confull the reliance "How the while you are done I'll normar "How that which you are singing that thought ow who is the follow whose his foliand here? This is the condition of affairs in California as it was gleaned from the representatives of various sections, whether the predominating industry of these sections is mining, wheat-relating of the predominating industry of these sections is mining, wheat-relating of finit-growing. It is a condition which me partisan outery can after, and he is a better partisan than citizen who would if be could, after it by denying it existence. Republican, Democrator Populist, all are directly interested in that presperity, which is becoming a reality rather than a mere promise.

The REPUBLICAN congratulates it realizes on this improved condition of affairs, and it does this with the better cheer because it conceives that its constituency has particular cause for exhibiteration in contemplating the situation. Wheat is raised here, and wheat mean mony this year. The raisin grape and other fruits command good prices. We have had grain and fruit in planty in the past, but, between a railroad monopply and a demoralized market, we have very

In music should begin at an early age.

"As the twig is bent so the tree's inclined," is more noticeable in matters of musical education than in mything else. False notes should have no place in the beginning. A perfect instrument is just age essential then as at any other time. You expect to get a good instrument some time—there is no better time than now. Let us allow you our world-renowned "Kna'se," the uristic favorite of the age. Our stock comprises in addition—such favorites as the "Decker Hrothers," Flecher, Ivers & Pond, Mason & Handlin, Standard, Trowbridge, Kobler & Obsee, Kimball and many others too numerons to mention, and each and every one fully warranted to and this or any other climate, Our warrantee is backed up by financial morely idle talk.
We varry in stock six different makes of Plance which have the Mandolin attachment, imitating the Mandolin, Harp, Zither (entar, Banjo, Music Box, etc. We sail in these goods at the right prices and on terms to suit the purchaser. When we say right prices, we mean it; and, for example, let us quate you a few prices: We will sell you a limingrade Plano with the Mandolin attachment, including a fine shool and sear! Jack Hoskins and Mr. Raynolds are building a saw mill about four miles above Coarsa Gold. Although the mill will be of small capacity, its owners, says will be of small capacity, its own to say; the Madera Marcary, have secured orders for over 1,000,000 fent of lomber. It will prove a great convanience to the people in the vicinity of Coarse Gold, as it is impossible to get lumber from the Misma mills during the winter owing is snow and bad roads. The mill will also suow and bad roads. The mill will also prove a great convenience to miners who need lumber. On several occasions perties have gone to that section, located mines, obtained their machinery and then found that they could get, no imper. With the new mill running right at their door, these difficulties will be novercome and lumber will be much cheaper. The machinery for the new mill is now on the ground, and the work of creeding the building in progressing rapidly. While the mill will be a great convenience to the people, it will also be a little gold mine for its owners. They have timber enough to run them three or four years.

IRRIGATION IN MADERA That County's Service to Be

Improved. BIG PROJECT IS UNDER WAY

Water From the Fresno River to Be Impounded for the Summer Months.

Madera county is to have a new irri-gation system, which, it is believed, will remedy the very unsatisfactory minner in which the farmers have been supplied with water. A new and ex-tonsive project is on feet to control waters in the mountains and gather a plentiful supply to irrigate Madera' fertile fields during the dry summe months.

The Madera Canal and Irrigation

Company is promoting the scheme which means so much to our northern natchbors. For the past few weeks the company's engineer. I Teilman of this company's engineer, I Testman or one-ity, has been working on the project, and ha feels entisfied that it can be made success. A horse was killed and six vehicles, inclinding Mrs. Cothout's handcome carriage, were broken up badly. Four of laws of the courty was in the courty of the county in the courty of the county in the connection of the county in the connection of the

water supply, and during the two months akmed the Fresno will have plenty of water with which to irrigate the county.

"I have looked up receiver sites along the stream in which to impound water to see later ha the summer when the river runs dry. It seems that the new river runs dry. It seems that the river runs density of the stream where we can construct reservoirs and retain a large quantity of water at comparatively small cost flowever, we have, as yet, not decided which site to take. It course, we shall do come more more figuring and choose the place where we can alore the most water and where the construction of duns and ditthese will cost the losat. It is not object to build one or more reservoirs that will hold water enough to emply a stream of 100 embis feet per second during a period of skyd says. This will give Madera county all the water that is mended for excessed irrigation. "Herstolore I have been of the opinion that Madera outh to obtain its water supply from the San Joaquin river. But I now believe, after a thorough investigation, that with the extensive improvement of the present system from Fresno river the farmers will obtain a bester service than they could if the water would by no means begiven, and the coot of this system would not be able to obtain water. A satisfactury service would by no means begiven, and the coot of this system would not be able to obtain water. "The fact remnine, however, that the farmers there resist yet learn considerable about irrigation before they can make a success of it. They have their lamis checked up in the old fashioned way of contour checks, and some of these contain as much as sixty acres. Of course to fined such a large piece of ground at one time is a difficult matter, and even here uround freame, where we have an ample supply of water, the standard check is only half an acre. "The Madera farmers will have to cut up their big checks into at loast 5-acre tracts for irrigating grain and not more than one acre for sillafa in order that they may use water advantageously."

To sell a product "short" mean Tremt the San Francisco Enformers.

To sell a product "short" means to contract to deliver at some future time that which the celler has yet to buy. He takes his chances of buying it at a price lower than he has sold for. A person who has sold short desires low prices, and it is his anterset to lead producers to sell chap. To sell when short is dancerone since the volume of business is ton large to be controlled by any combination, however, powerful. To sell such products as prunes and raises short, however, is seller and its frequently made to yield a profit to the operator. The raisin product of this country, for example, is usinly concentrated in a few configuous commites, and the producers have not been prosperous for some years and are most of them in need of mosey. In the end prices will he regulated by supply and demand, but these cannot be very accurately settimated in advance. Suppose a strong raisins will he worth in the height of the season at the season of the season of the producer of services and the control of the season it issues a circular offering to the tesson of the season of the seaso

Overall, Viselia's requier twirler, di not appear on account of illness. Willis filled his position creditably and had he received even fair support the score would have assumed other proportions. The absence of the pitcher cauced a general shift in the makeup of the victing nine and Racine, of football fame, was installed at bag No. 2, which position he bedd down in good shape. The twe teams play again next Thurstay at Viselia. On this occasion the Hertheleans' abstray will be Chance and Thompson.

to December 25th. Phil M. Baier, the well-known orange grower of Porterville, was the first to suggest such a display, and the proposition met with immediate favor in all the conoties named.

The persons interested in this plan next usked themselves the following question: If it is a good thing for the counties of Central California to unite for the purpose of making a display in the Bast, why would it not be equally alvantageous for them to combine permanently for furthering the interests of the richest region of California?

The answer to this question was the organization on Saturday of the Central California Developing. Association. Rvery person at the meeting was in lavor of organizing, and several epuke of the benefit that would accrue to the counties from it. After this matter had been thoroughly discussed officers were elected as follows: President, Fulton G. Berry of Freeno; vice president, Senator S. G. Smith of Ken; secretary, John Reichman of Freeno; treasurer, Sus Mitchell of Tulars, canges, when, etc.—at sympositions; to encourage the studies of the studies of the result of the secretary in the product of Central California—such as dried fruits, freeling the resulting of the counties fruits, seemed of best eagar factories and other industries in this part of the valley; to thoroughly advertuse the resources of Central California and turn that the contral California and transition to the contral California and transition the contral California and transition to the contral California and transition to the contral California and transition the contral California and transition to the contral California and transition the contral California and transition the contral California
